

2-WAY MID-HIGH UNIT

1 CNC-machined aluminium alloy finishing ring.

**2** Pole cup CNC machined from a solid piece of ultra-low-carbon steel.

**3** Oversized, high quality neodymium magnet. This "motor" guarantees a perfectly linear response and constant magnetic flux over the entire working range of the tweeter, assuring an extremely linear and neutral response both at low and high volumes. A careful study supported by FEM analysis allowed us to design the metal parts of the magnet to maximize the flow exactly around the voice coil, and make it linear throughout its entire excursion. Ventilation is ensured by a large opening on the bottom, protected by a filter with calibrated holes. This solution also reduces the peak impedance to the resonance frequency, making the tweeter easier to interface with any passive crossovers.

4 Magnet plate in ultra-low-carbon steel.

**5** Body made of 7000 aluminum alloy and brass, manufactured entirely by numerical control (CNC). This makes the structure very rigid with practically zero tolerances, yielding consistency of performance and maximum linearity of reproduction, free from any vibration and/or resonance.

**5** Residual resonances are neutralized by the under-dome, dB Cloth® damping material. This extends the frequency response to the lower limits and reduces harmonic distortion.

7 The large 28 mm diameter voice coil is the best compromise between the lightness of the standard 25 mm coil and the great power management of 32 mm coils. This perfect combination of power and lightness is necessary for a tweeter that must reproduce frequencies in a linear and faithful way, even beyond the threshold of audibility. The voice coil uses an aluminum support to better disperse the temperature.

8 The carbon fiber reinforced, polymer matrix composite dome ensures extraordinary rigidity combined with a very low weight.

**9** CNC-machined billet aluminum flange allows the midrange and tweeter to be mounted using screws, so the two speakers can also be replaced.

**10** Removable grill for dome protection.

10 CNC-machined aluminium alloy finishing ring.

**11** Pole cup CNC machined from a solid piece of ultra-low-carbon steel.

**12** Oversized, high quality neodymium magnet. This "motor" guarantees a perfectly linear response and constant magnetic flux over the entire working range of the tweeter, assuring an extremely linear and neutral response both at low and high volumes. A careful study supported by FEM analysis allowed us to design the metal parts of the magnet to maximize the flow exactly around the voice coil, and make it linear throughout its entire excursion. Ventilation is ensured by a large opening on the bottom, protected by a filter with calibrated holes. This solution also reduces the peak impedance to the resonance frequency, making the tweeter easier to interface with any passive crossovers.

13 Magnet plate in ultra-low-carbon steel.

**14** Residual resonances are neutralized by the under-dome, dB Cloth® damping material. This extends the frequency response to the lower limits and reduces harmonic distortion.

**15** The large 28 mm diameter voice coil is the best compromise between the lightness of the standard 25 mm coil and the great power management of 32 mm coils. This perfect combination of power and lightness is necessary for a tweeter that must reproduce frequencies in a linear and faithful way, even beyond the threshold of audibility. The voice coil uses an aluminum support to better disperse the temperature.

16 The carbon fiber reinforced, polymer matrix composite dome ensures extraordinary rigidity combined with a very low weight.

**17** CNC-machined billet aluminum flange allows the midrange and tweeter to be mounted using screws, so the two speakers can also be replaced.

**18** Removable grill for dome protection.

### 5.UMA - TWEETER

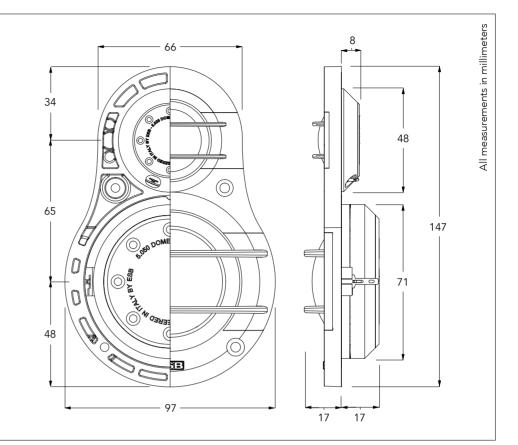

Speaker Type: Component Tweeter Nominal Diameter: 1.1"/28 mm Nominal Impedance (Znom): 4 Ohms Continuous Power Handling: 110 W Peak Power Handling: 220 W Rec. Amplifier Power: 40 - 150W (RMS)

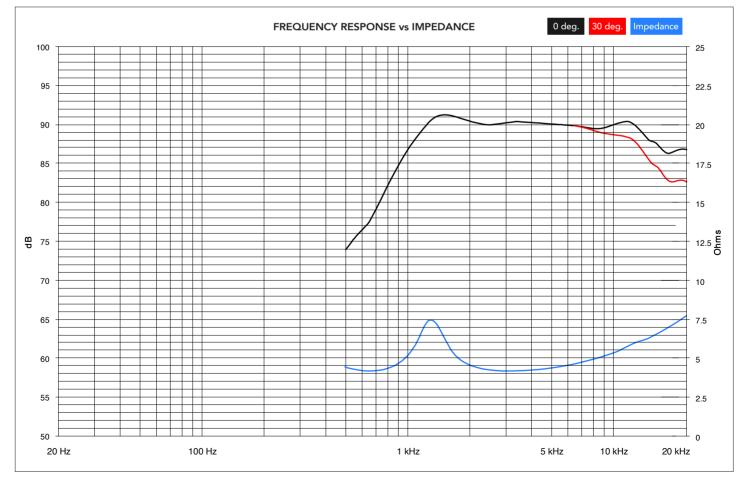

## PARAMETERS

Voice Coil Resistance (Re): 3.5 Ohms Voice Coil Diameter: 28 mm Free Air Resonance (Fs): 710 Hz Sensitivity: 91.0 dB @ 1W/1m 94.0 dB @ 2.83V/1m Electrical "Q" (Qes): 1.73 Mechanical "Q" (Qms): 1.95 Total Speaker "Q" (Qts): 0.91

#### DESIGN BANDWIDTH

With 48 dB/oct. HP filters: 1.2 KHz - 25 KHz With 24 dB/oct. HP filters: 1.6 KHz - 25 KHz With 12 dB/oct. HP filters: 2 KHz - 25 KHz

2-WAY MID-HIGH UNIT

5.UMA

### 5.UMA - MIDRANGE

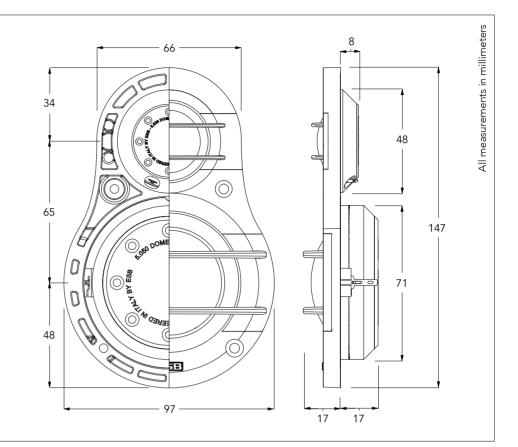

Speaker Type: Component Midrange Nominal Diameter: 2"/50 mm Nominal Impedance (Znom): 4 Ohms Continuous Power Handling: 120 W Peak Power Handling: 240 W Rec. Amplifier Power: 50 - 160W (RMS)

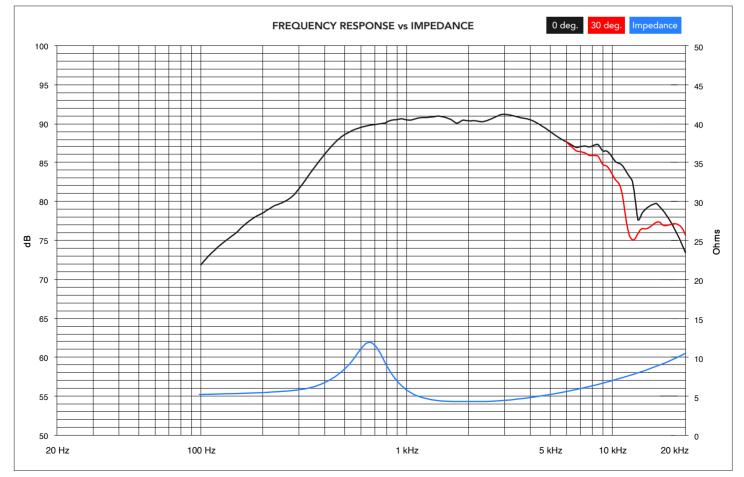

# PARAMETERS

Voice Coil Resistance (Re): 3.5 Ohms Voice Coil Diameter: 25 mm Free Air Resonance (Fs): 630 Hz Sensitivity: 91.0 dB @ 1W/1m 94.0 dB @ 2.83V/1m Electrical "Q" (Qes): 1.009 Mechanical "Q" (Qms): 2.60 Total Speaker "Q" (Qts): 0.75

### DESIGN BANDWIDTH

With 48 dB/oct. HP filters: 600 Hz - 5 KHz With 24 dB/oct. HP filters: 700 Hz - 5 KHz With 12 dB/oct. HP filters: 800 Hz - 5 KHz
